[What Are Your Favorite Add-ons For Mac](#)

It is quite simple to set this up, and can even be expanded to effectively create a favorites list right on the Dock.. Sites that are visited on a regular basis can appear on a browser's 'frequently visited' listings on the default landing page, or a bookmark could be added to a toolbar or the favorites list for later access.. Adding a bookmark to the Dock can automatically open the user's browser of choice to a specific website, all with a single click.
